---

ABOUT ME	I am a software developer with a passion for building practical and user-friendly websites. Problem solving is what I do best, and I have used this skill many times when creating websites that simplify complex tasks for everyday use. My expertise in Full Stack development has been shaped through hands-on experience, continuous learning, and formal training at Dev Academy NZ, where I refined my skills and collaborated on team-based projects. On top of my experience in developing websites I have experience in using the cloud to deploy my websites as demonstrated in my portfolio. My portfolio features a selection of projects, each demonstrating my skills through live, publicly deployed websites.

WHAT I'M WORKING ON NOW	I have recently completed the Microsoft Azure Fundamentals certificate and am in the process of completing more cloud certifications as deploying software publicly is just as important as developing the software.

SKILLS	**I am highly knowledgeable in but not limited to the following software, languages, libraries and frameworks**

HTML, CSS, JavaScript, TypeScript, React, NodeJS, C#, .NET, SQL, Git, GitHub.

Other Skills

- Problem Solving
- Troubleshooting and debugging errors
- Ability to learn and grow from feedback
- Ability to learn and adapt to new technologies quickly
- Working in a dynamic team environment

EDUCATION

Dev Academy NZ (2024)

Dev Academy is an intense Full Stack web development course where on a daily basis I was tasked with building web applications both collaboratively and independently. During this course I was forced to learn and adapt to new technologies very quickly and I was constantly tasked with having to problem solve and debug issues. At Dev Academy I strengthened various technical skills as well as communication based skills such as leadership, working effectively with others, and giving / receiving actionable feedback. This is where I received my New Zealand Level 6 Certificate, Applied Software Development.

RECENT WORK
HISTORY

Self Employment

Period: 2022 - 2025

I have worked in this period as a delivery contractor offering delivery services across various different companies. This was a self directed role where I managed my schedule, optimized delivery routes, and ensured timely and efficient service to customers.

NZ Post

Period: 2023 - 2024

At this job I worked in operations which is a role that took place in NZ Posts depot in Lower Hutt where I was tasked with sorting and scanning parcels as well as various housekeeping activities. In this role I was expected to work independently most of the time and I always knew what task I should be doing at the current moment.
